

GLASS

Description

Selleys Glass Silicone is an acetic acid curing 100% silicone, which has excellent adhesion to glass and has been especially formulated for glazing and aquarium construction.

Uses

- ▶ Glass
- ▶ Aluminium
- ▶ Stainless Steel
- ▶ Many plastics including polystyrene
- ▶ Most Woods
- ▶ Rubber / Canvas
- ▶ Glazed ceramics & porcelain

Technical Features

- ▶ The acetic curing formulation results in superior adhesion on glass and glazing surfaces.
- ▶ Superior silicone formulation forms a durable seal and which does not shrink when drying.
- ▶ UV and weather resistant remaining flexible, not shrinking, crumbling, cracking or drying out.
- ▶ Temperature resistance – approximately -60°C +150°C
- ▶ Superior flexibility +/- 25% movement capability & up to 400% elongation or stretch.
